

Tech-Driven Risk Prevention for the Towing Industry

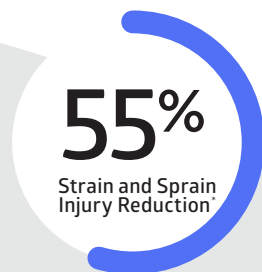

Proven Loss-Reduction Technology

World-class wearable tech helps protect workers in environments where high strain and sprain injury rates are present, like in the towing industry. The Kinetic Reflex wearable platform detects high risk behaviors and provides data-driven insights to prevent strain & sprain injuries and claims before they happen.

Strain & Sprain Claims are Leading Loss Drivers

Towing is an inherently hazardous industry where dangerous working conditions and physically-demanding tasks make workers prone to accidents and injuries, especially strains and strains. The motor vehicle towing industry has a higher rate of work-related injury and death compared to other industries.
